PRESS RELEASE

December 27, 2022

STEM News Technical Journal. LLC announces additions to our 2023 Editorial Planning Board. We are pleased to announce that Charlotte King, Shareefah Nadir Mason, Apurva Bhardwaj, and Clarice Phelps will join others serving our Editorial Planning Board on January 1, 2023.

These professionals have demonstrated a history of support for science and engineering race and gender diversity as they have made significant accomplishments in their respective fields of science, engineering, and education.

Ms. King is President & Creative Director, **Snowden & King Marketing Communications** with over 25 years' experience in consulting, public and energy policy strategy, and B@B communications.

Ms. Mason is Associate Dean of Educator Certification, Dallas College and producer of **From the Block** film that tells the story of Black educators in a marginalized community.

Ms. Bhardwaj is Business and Market Analyst for **Intrinsic Analytics** and a biotechnologist with a strong cancer research background and experience in medical and scientific writing, consulting, and business development.

Mrs. Phelps is a nuclear chemist at the Department of Energy **Oak Ridge National Laboratory** and the first African American woman to help discover a chemical element.

Our publication portfolio for 2023 developed by the volunteer members of our Editorial Planning Board is structured through research and will attract technical papers and essays for our global audience of educators, scientists, technologist, engineers, and the business community as advocates of diversity and inclusion in STEM careers.
